Where children learn through play and fun in a natural environment. This program is also designed to facilitate family therapy, and parent training.

CoEd groups for children ages 6-8, 9-11, and 12-14 dealing with but not limited to worry, fear, separation anxiety, sadness, friendship, anger, sleep, headaches, self-esteem and confidence, and ADHD.

The groups are based on Cognitive Behavioral Therapy (CBT), Behavioral Modification, and Biofeedback. The participants will experience Biofeedback, a system of visual learning that gives people a sense of control over their physical and emotional symptoms through the use of electronic instruments.

New participants must complete an Initial Evaluation at Appleton Psychiatric & Counseling Center.
